

Positivus Landing Page

This project is a Next.js implementation of the open-source design for the Positivus landing page, originally created in Figma. You can view the Figma design [here](#). This site is currently a static web page, reflecting the original design as closely as possible.

Project Overview

- **Demo Vercel:** <https://figma-example-six.vercel.app/>
- **Design:** Created in Figma, open-source community design for Positivus landing page.
- **Framework:** Developed using [Next.js](#).
- **Current State:** Static web page.

Features

- Reproduces the Positivus landing page design with precise detail.
- Implemented as a single static page.
- Optimized for fast loading and high performance.

Getting Started

Prerequisites

Ensure you have the following installed:

- [Node.js](#) (v14+ recommended)
- [npm](#) or [yarn](#)

Installation

Clone the repository and install dependencies:

```
git clone https://github.com/yourusername/positivus-landing-page.git
cd positivus-landing-page
npm install
# or
yarn install
```

Running Locally

Start the development server:

```
npm run dev
# or
```

```
yarn dev
```

Open <http://localhost:3000> to view the page in your browser.

Building for Production

To create an optimized production build:

```
npm run build  
npm run start  
# or  
yarn build  
yarn start
```

Deployment

This static site can be deployed on any hosting service that supports Next.js, such as [Vercel](#) or Netlify.
